# Breakfast series Sunny – The perfect way to start your day

Dinkelsbühl/Germany, 16 May 2024 | The 'Sunny' breakfast series by Rommelsbacher is the perfect equipment for a successful start to the day. This series presents three high-quality appliances for a relaxed breakfast experience: The filter coffee machine FKM 1000, the toaster TO 850 and the water kettle WK 3000. What they all have in common is the straightforward design, the user-friendly easy-to-use operating concept with touch sensors and a clear LED display. All three products have already received awards in various comparative tests.

## FKM 1000 filter coffee machine: Fresh coffee at the touch of a button

The FKM 1000 filter coffee machine from Rommelsbacher impresses with its attractive design and ease of use. It brews up to 12 cups of aromatic coffee in one go. With a removable water tank for easy filling and a touch control operating concept with a large LED display, it is the ideal companion for enjoying your morning coffee. A brewing shower with aroma function ensures an intense taste experience, while the automatic keep-warm-function ensures that the coffee stays at the right temperature. The removable permanent filter makes you independent of filter bags. Thanks to the removable filter holder and cleaning/descaling program, the FKM 1000 is also very easy to clean. The coffee machine was rated 'very good (1.4)' in the 'Haus & Garten Test' comparison and is available at an RRP of € 69.99.

## TO 850 toaster: Perfectly toasted slices of bread every time

The TO 850 toaster made by Rommelsbacher is an expert in browning. With its extra-wide slots and automatic bread slice centring, it ensures that every slice of toast – even XL-sized slices – is toasted evenly. The Touch Control operating concept, with a large display and practical countdown display of the remaining toasting time, makes operation child's play, while the intelligent toasting time control and 9 levels of browning reliably meet individual toasting preferences. The defrosting level for frozen slices of bread and a practical reheating function offer additional convenience if the toast needs to be reheated. A removable bread roll attachment rounds off the extensive range of functions of this practical breakfast helper. For safe handling, the toasting process can be ended prematurely using the stop button. And afterwards? The crumb tray makes cleaning easy. Then the power cable disappears into the cord storage and the toaster can be conveniently stored away until the next use. The TO 850 was rated 'good (2.32)' in the 'Haus & Garten Test' comparison and is available at an RRP of € 59.99.

## WK 3000 water kettle: The desired temperature in seconds

With 3,000 watts, the WK 3000 water kettle from Rommelsbacher brings water to the boil or to the desired temperature in a matter of seconds. The stainless steel jug holds 1.7 litres and delivers water at the exact temperature in 6 levels from 45 – 100 °C. Whether brewing tea, hot water for instant meals or warm water for baby food – everything is done quickly and at the right temperature. The one-button control with quick-start function is positioned directly on the handle and makes operation particularly convenient and clear. The current water temperature can be

read off the display at any time, and a keep-warm function keeps the final temperature constant for half an hour. Maximum safety during use is guaranteed by the automatic boil-stoop function, boil-dry protection, the insulated handle, and the 2-step lid position. The latter ensures easy access to the interior and therefore easy cleaning. The fast electric kettle WK 3000 was awarded the test winner 'very good (1.1)' in the 'electric kettle with temperature selection' category by 'ETM Testmagazin' and also received a 'very good (1.4)' in the comparative test by 'Haus & Garten Test'. The WK 3000 is available at an RRP of € 59.99.

The 'Sunny' breakfast series from Rommelsbacher combines timeless design, innovative functionality and convenient operation – for the perfect start to the day.

### About ROMMELSBACHER ElektroHausgeräte GmbH:

Our roots are in Stuttgart, where Dipl.-Ing. Gustav Rommelsbacher started his business in the year 1928 with the design and production of loudspeaker systems. He was an inventive genius with innovative ideas and the good instinct for the trends and needs of his time. After World War II, Dinkelsbühl/Germany became his new home. He started his production in a garage, with all materials he could get hold of, and made electric appliances which were urgently needed at that time. Radiators, electric irons, and mobile cooking plates were manufactured under the brand robusta and soon delivered to many countries. The first brick-built factory was designed and expanded in the years that followed. His son, his daughter and his son-in-law joined the team and robusta became ROMMELSBACHER. In a spirit of great commitment, with high quality appliances and the strengths of a family-owned company, they developed a brand which is well-known for its first-class products.

In 1991, the third generation entered the business and in 1995, ROMMELSBACHER moved premises to a larger block of buildings which formed the perfect basis for further growth.

Modernization and expansion started in 2014, making the Dinkelsbühl/Germany premises fit for the future, since the fourth generation is already waiting in the wings.
