

BUILT-IN COOKTOP DOMINO CERAN®

with runtime limitation via 15-minute timer

Safe & reliable, for particularly sensitive environments

ROMMELSBACHER

This Domino built-in cooktop combines reliable technology with maximum safety. It has been specially designed for sensitive environments such as hospitals, senior residences, living units, student accommodations, daycare centres, military facilities, or living areas for people with disabilities – anywhere safety and ease of use are top priorities. Both cooking zones can only be operated using a **manual timer (up to 15 minutes)**, ensuring that the **operating time of both zones is limited**. Thus, the appliance ensures the highest level of safety. Ideal to prevent unintended continuous heating and to save energy. The durable SCHOTT CERAN® cooking surface as well as powerful, energy-efficient HiLight® heating elements allow for convenient and fast cooking. Thoughtful design details such as residual heat indicators, an operating pilot light, and an easy-to-clean stainless-steel frame complete the high-quality overall appearance. Delivery includes installation kit and cable with Schuko plug, ready for connection.

SCHOTT
CERAN®

Technical data:

- type: EBC 3075/E-15M
- 230 V ~ • 3000 W (145 mm Ø 1200 W, 180 mm Ø 1800 W)
- runtime limitation via **manual timer** (up to 15 minutes) for both cooking zones
- high-quality brushed stainless-steel frame, ergonomically shaped rotary knobs
- original SCHOTT CERAN® glass-ceramic cooking surface – durable and easy to clean
- energy saving HiLight® heating elements, short heat-up time, excellent efficiency
- infinite temperature control, automatic cooking system, automatic shut-off
- operating pilot light, 2 residual heat indicators
- complete with installation kit and 1.5 m cable with Schuko plug
- installation dimensions: 270 x 500 x 67 mm
- appliance dimensions: 288 x 530 x 80 mm
- EAN: 40 01797 513038
