

# COFFEE MILL

## *with conical burr grinder*

### Grinding coffee like a pro

A coffee mill that meets highest demands, delivering perfect grinding results constantly. The effective conical burr grinder made of stainless steel grants the most flavour-preserving way of grinding coffee and espresso beans. There are 35 levels to set the coarseness – from extra fine for espresso, medium for drip coffee and coarse for French press coffee. When it comes to dosing, up to 12 portions are possible in one go, whereby the portion size can be adjusted in 10 steps to suit your personal taste. Beans tank and powder container offer a good view insight as well as aroma protection. Moreover, the appliance impresses with its integrated antistatic function, which neutralizes the static charge in the ground powder. A clean affair! There is also the option to directly grinding the coffee into a porta filter. The removable holder for porta-filter makes this coffee mill a perfect addition to porta-filter machines. The EKM 400 offers much professionalism for the demanding coffee and espresso lovers!
