# Simple. Versatile. Delicious. – Multi Rice Cooker for much more than just rice

**Dinkelsbühl, 20 March 2026 | Whether rice, quinoa or spelt: the MRK 650 and MRK 950 Multi Rice Cookers from Rommelsbacher cook grains and superfoods to perfection using precise 3D heating technology. Intuitive and comprehensive programmes, combined with an elegant design, make them reliable companions for healthy, hassle-free everyday cooking. An independent practical test also confirms the high reliability and ease of use of the appliances.**

Cooking rice to perfection – and much more besides: with the MRK 650 and MRK 950 Multi Rice Cookers, Rommelsbacher expands the classic rice cooker's capabilities to offer versatile options for a modern, balanced diet. Whether rice, quinoa, spelt or porridge – the appliances are tailored to different types of grain. This ensures convenient, precise cooking.

At the heart of the system is modern 3D heating technology, which heats the food evenly all round – for consistent results, regardless of whether classic rice varieties or nutrient-rich alternatives are being cooked. Three specifically tailored rice programmes ensure reliable results for the most common varieties.

In addition, nine automatic programmes are available, specifically designed for typical everyday meals. From aromatic soups and stews to creamy porridge, a variety of dishes can be cooked with minimal effort. Variable cooking times offer additional flexibility to suit individual preferences.

The integrated steaming tray makes the MRK series a compact all-in-one solution: whilst the rice cooks at the bottom, gently prepared vegetables or fish are cooked at the top – nutritious and practical. The appliances also impress in daily use with their user-friendly features. A clear LED display ensures intuitive operation, whilst the keep-warm function and 24-hour timer support flexible planning. The high-quality non-stick coating makes cleaning significantly easier. The clean, modern design makes the appliances a real eye-catcher. The stainless steel trim with anti-fingerprint coating ensures they retain their high-quality appearance even with daily use.

"With our Multi Rice Cookers, we demonstrate how a wide variety of grains can be cooked reliably and easily," says Thomas Gehring, marketing expert at Rommelsbacher and a passionate amateur cook. A recent practical test by an independent consumer magazine confirms the MRK series' excellent suitability for everyday use and recommends it as a practical tip. Particular praise was given to the consistent cooking results, the intuitive operation and the practical steaming insert, which allows for complete meals in a single step.

The MRK 650 (3 litre) and MRK 950 (5- litre) Multi Rice Cookers from Rommelsbacher are now available from specialist retailers for €99.99 and €129.99 respectively.

### About ROMMELSBACHER ElektroHausgeräte GmbH:

Our roots are in Stuttgart, where Dipl.-Ing. Gustav Rommelsbacher started his business in the year 1928 with the design and production of loudspeaker systems. He was an inventive genius with innovative ideas and the good instinct for the trends and needs of his time.

After World War II, Dinkelsbühl/Germany became his new home. He started his production in a garage, with all materials he could get hold of, and made electric appliances which were urgently needed at that time. Radiators, electric irons and mobile cooking plates were manufactured under the brand robusta and soon delivered to many countries. The first brick-built factory was designed and expanded in the years that followed. His son, his daughter and his son-in-law joined the team and robusta became ROMMELSBACHER. In a spirit of great commitment, with high quality appliances and the strengths of a family-owned company, they developed a brand which is well-known for its first-class products.

In 1991, the third generation entered the business and in 1995, ROMMELSBACHER moved premises to a larger block of buildings which formed the perfect basis for further growth.

Modernization and expansion started in 2014, making the Dinkelsbühl/Germany premises fit for the future, since the fourth generation is already waiting in the wings.
