

MOBILE INDUCTION COOKING PLATE

with selectable power limitation

A lightweight for kitchen, summerhouse, motorhome

Mobile cooking has never been more flexible than with this innovative induction cooking plate from ROMMELSBACHER. Super-light, handy, round-shaped, quiet and contemporary with selectable current/power limitation – the single cooking plate impresses with its innovative technology, highly variable application options and convenient handling. This mobile cooking plate is perfect as an additional cooking plate in your kitchen at home but can also be used reliably with electricity from the inverter in a motorhome or garden shed (photovoltaic). The special Rommelsbacher POWER switch technology with power limitation combined with modern induction technology (*the heat is generated at the pan bottom, not on the cooking plate*) ensures optimum efficiency. Induction provides 90 % efficiency, saves energy and enables fast cooking. Other features such as pot recognition, residual heat indicator, overheating protection, automatic switch-off and non-slip silicone feet guarantee a high level of safety for users. Last but not least this induction cooking plate has an optimised housing cooling system that allows super-quiet operation. This round single cooking plate from the new generation of the ROMMELSBACHER induction series makes mobile cooking simple, contemporary and future-orientated.

Technical data:

- type: CTA 1800/IN
- 220-240 V ~ up to 1800 W
- compact design, space-saving and light for mobile use
- high-quality, robust, easy-care glass ceramic surface
- for induction-capable pots and pans from 12 to 20 cm Ø
- LED display, 9 power levels, control via touch sensors
- POWER switch: needs-based limitation of current/power to the existing power grid or to the available currents
 - 4-amp setting (power up to 800 W) – for use with photovoltaic systems, emergency power generators, power stations/mobile storage systems
 - 6-amp setting (power up to 1250 W) – for operation on campsites or with inverter in the camper van
 - 10-amp setting (power up to 1800 W) – for use with shore power or with the normal mains power at home
- memory function: selected ampere setting can be stored for the next use
- very simple to use, very quiet operation due to optimized fan control for housing cooling
- maximum safety thanks to pot recognition, residual heat indicator, pilot lamps, overheating protection, automatic switch-off and non-slip silicone feet
- includes detachable power cord and handy carry bag
- EAN: 40 01797 676016
