

WATER FILTER

for Rommelsbacher espresso makers

Pure water for full coffee flavour

ROMMELSBACHER

When preparing perfect espresso, not only the choice of the bean and the correct grinding degree are important but also the water quality. Thus, we recommend using our superior water filter for the Rommelsbacher espresso machines "Classico" and "Automatico" as well as for the coffee/espresso centre "Duo deluxe". The filter cleans and demineralises the water, ensures, thus, consistently good water quality and prevents calcification of the appliance. The superior filter material in the cartridge remains active for many weeks. The date of exchange can be set on the upper side of the filter; so it is well apparent how long the filter has been used already. To ensure flawless function of the machine, a regular exchange of the water filter is recommended.

suitable for Rommelsbacher's models

EKS 1500

EKS 2000

EKS 3000

Product specifications:

- type: EKF 1
- superior filter granulate with activated carbon
- active for many weeks (*exchange after 30 – 50 litres depending on the water hardness, but after 2 months at the latest*)
- exchange display on the upper side of the filter
- dimensions (B x D x H): 5.5 x 3.8 x 10 cm
- EAN: 40 01797 206015
