

# TRAVEL IMMERSION HEATER

## *stainless steel*

Practical, quick and compact

# ROMMELSBACHER

An established classic of German production. The handy travel immersion heaters, made of high-grade stainless steel, are just perfect to quickly heat small amounts of water when travelling, in the office and at home. Whether in a cup, in a heat-resistant tumbler or in the tea pot – the required amount of water is **quickly heated directly in the vessel**. The coil is made of superior, food-safe stainless steel material; thus, it is free from allergenic metals such as nickel. Safety during use is ensured by a heat-insulated handle with a spacer and integrated overheating protection. The appliance comes in an attractive travel case, making it an ideal gift, too.

Type RT 350

Type RTG 351

### Technical data:

- tubular heating element made of stainless steel
- overheating protection
- heat-insulated handle with spacer for safe handling
- power cord with anti-kink sleeve
- power: 350 W
- practical travel case
- *Large immersion heaters are also available in various models (types TS 1001, TS 1502, TS 2003)*

#### **Type: RT 350**

- 230 V ~ 350 W
- for up to 0.25 l of water
- 5 x 5 x 20 cm
- EAN: 4001797321015

#### **Type: RTG 351**

- same as Type RT 350 but including
- cup of tempered glass (ca. 200 ml) with grip ring
- EAN: 4001797321022
