

ROMMELSBACHER

CAMPING

2025

OVER 95 YEARS OF TRADITION, A SOURCE OF TRUE PRIDE!

Gustav Rommelsbacher

1928

Our roots are in Stuttgart, where Dipl.-Ing. Gustav Rommelsbacher started his business in the year 1928 with the design and production of loudspeaker systems. He was an inventive genius with innovative ideas and the good instinct for the trends and needs of his time.

After World War II, Dinkelsbuehl became his new home. He started his production in a garage, with all materials he could get hold of, and made electric appliances which were urgently needed. Radiators, electric irons and mobile hotplates were manufactured under the brand name robusta and soon they were delivered to several countries.

Susanne and Wilfried Bauer

1953

The first brick-built factory was designed and expanded in the years that followed. His son, his daughter and his son-in-law joined the team and robusta became ROMMELSBACHER. In a spirit of great commitment, with high quality appliances and the strengths of a family-owned company, they developed a brand which is well-known for its first class products.

In 1991, the third generation entered the business and in 1995, ROMMELSBACHER moved premises to a larger block of buildings which formed the perfect basis for further growth.

Sigrid Klenk

1991

In the years 2014 and 2015, the largest investment to date was made with the construction of a new large warehouse, the expansion of the production areas and an additional modern administration building, placing ROMMELSBACHER in an even better position for the future. Ongoing extensive modernizations in production and warehouse logistics for even better working conditions round off these optimizations. The photo studio inaugurated in 2022, together with other modern offices, is currently being equipped with an attractive test kitchen for photo and film shootings.

Join us - experience us! A real German family business - with a great team, great products and a lot of JOY!

QUALITY **MADE IN GERMANY**

Over 100 employees with more than 1.000 years of cumulated ROMMELSBACHER know-how develop, design and manufacture high-quality appliances which are Made in Germany and provide 'Pure Cooking Pleasure' true to our company's motto.

We can react flexibly on your requirements and offer tailor-made solutions, which convince not only thanks to functional and aesthetic qualities but also for economic reasons.

We take pride in our over 95-year history, our committed team, our family-owned company and our brilliant range of products, which is presented in this catalogue and well worth a browse.

Wir produzieren Deutschland®

EXCELLENT ELECTRICAL HOUSEHOLD APPLIANCES

There are many rewards for quality and design that affirm the excellent working of the complete team. Each single logo is a proof for us that our products and the trade mark ROMMELSBACHER are going down well also with the consumers and that people appreciate our high quality standard.

"We attach great importance to the fact that our brand values like quality, reliability and a strong customer focussing are not only communicated, but get also implemented and put into practice stringently.", said Mrs. Sigrid Klenk, managing director of the ROMMELSBACHER ElektroHausgeräte GmbH.

We are meeting this challenge with great pleasure and get excited even more when our efforts get recompensed by so many excellent rewards. Please see a selection of our rewards below.

SUSTAINABILITY – MORE THAN MERE ECOLOGY!

We understand sustainability as an holistic approach, a composition of ecology, economy and social responsibility. ROMMELSBACHER is one of the very few enterprises in the electrical household sector who is manufacturing in Germany. Materials and components are mainly purchased from local partners.

We attach great importance to the fact that customers may experience a longstanding and trouble-free usage of our products, pursuant to our motto "pure cooking pleasure". And just in case, we are keeping a stock of spare and wear parts for our products for years to come, as they can be repaired with simple tools. Even returned appliances get a second life cycle after a thorough check.

Establishing new buildings and doing some renovation work in the year 2015, brought our enterprise up to date with the latest energetic technology. Also the workplaces of our staff were ergonomically and ecologically optimized. Our next goal is to achieve climate-neutral production at the Dinkelsbühl site. To achieve this, we will use further resources for an ecological energy production.

We develop and distribute appliances that are meant for preparing healthy and rich dishes and which comply with a sustainable handling of food. To emphasise are e.g. our vacuuming systems, which prolong the shelf life of foods quite a lot. Also our oil press OP 700 "Emilio" is worth to be mentioned, as it is not only possible to make cold-pressed oil from seeds and kernels but even the remaining oil cake can be used for preparing healthy dishes. And our spiralizer EGS 80 "Gnudel" got the 'Eat healthy'-Award.

We recently got the grade for "Trusted Sustainability", which makes us very happy. But we do not consider it to be a final confirmation, however, to be the starting shot for a constant monitoring how we can improve.

NEW

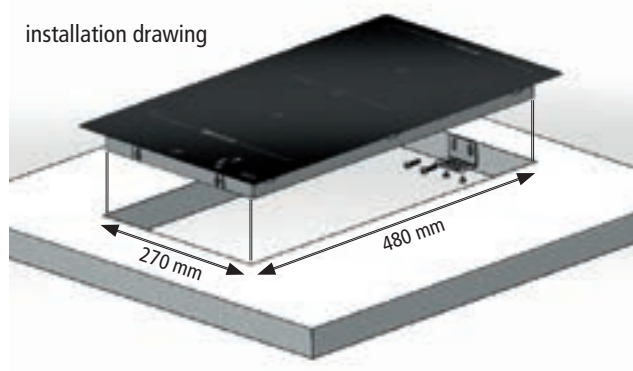

DOMINO BUILT-IN HOB EBC-V 3510/IN Induction

**flexibility in power consumption & cooking surface size
versatile use in your home, garden and motorhome**

- frameless SCHOTT CERAN® High Trans Eco glass ceramic surface: solid and easy to clean
- two square cooking zones, each 190 x 190 mm, each up to 2100 W (booster 3000 W) for induction cookware from 110 mm diameter
- power management, flexible power limitation, thus perfect for operation with inverter (as of 1500 W), with memory function
- maximum flexibility: the maximum power consumption can be freely configured in 100 W steps between 1400 W and 3700 W to match the existing power supply
- with bridge function: connection of the 2 square cooking zones to form one large hob
- convenient slider control with smart keys for a good overview and intuitive use
- electronic control with Touch Control sensors
- immediate power transfer, extremely short heating time thanks to induction technology
- LED display, 9 power levels, automatic cooking system, power boost function, keep-warm level
- integrated timer, cooking zones with 99-minute timer with automatic switch-off and signal tone
- safety functions: sensor lock, child-proof lock, runtime limiter, overheating protection and residual heat indicator, pot detection
- installation dimensions: 270 x 480 x 80 mm
- power cord with safety plug
- complete with installation kit

SINGLE COOKING PLATE

CTA 1800/IN Induction

with selectable power limitation

A lightweight for kitchen, summerhouse, motorhome

- compact design, space-saving and light for mobile use
- high-quality, robust, easy-care glass ceramic surface
- for induction-compatible pots and pans from 12 to 20 cm Ø
- LED display, 9 power levels, control via touch sensors
- memory function: selected ampere setting can be stored for the next use
- POWER switch: needs-based limitation of current/power to the existing power grid or to the available currents
 - o 10-amp setting (power up to 1800 W) – for use with shore power or with the normal mains power at home
 - o 6-amp setting (power up to 1250 W) – for operation on campsites or with inverter in the camper van
 - o 4-amp setting (power up to 800 W) – for use with photovoltaic systems, emergency power generators, power stations/mobile storage systems
- very simple to use, very quiet operation due to optimized fan control for housing cooling
- maximum safety thanks to pot recognition, residual heat indicator, pilot lamps, overheating protection, automatic switch-off and non-slip silicone feet
- includes detachable power cord and handy storing bag
