

BARBECUE GRILL

can be combined with BBQ cart

The champion for pure grilling pleasure

ROMMELSBACHER

Our electric version of a traditional barbecue grill combines the advantages of electric grilling with the benefits of a barbecue grill with a lid. An electric barbecue works quickly, safely, and cleanly - which sets it apart from gas and charcoal barbecues and makes it absolutely contemporary. The BBQ 4000 is so compact that it is ready for use quickly and without lengthy preparation on the balcony or in the garden. All you need is a power socket and the barbecuing fun can begin. The lid ensures optimum heat storage during indirect grilling; the temperature display allows you to always keep an eye on the grilling temperature. The solid grill grid made of cast iron is perfect for leaving classic grill marks on the grilled food. Compact, powerful (up to 300 °C!) and mobile – the BBQ 4000 can be used indoors and outdoors regardless of the weather. Whether used alone as a BBQ table top grill or together with the BGW 100 barbecue cart as a mobile barbecue station: the BBQ 4000 makes barbecuing with friends and family a real pleasure.
