

STEAMER

with electronic programme selection

Non-fat cooking, preserving vitamins & flavour

ROMMELSBACHER

By means of this electronically controlled steamer made by Rommelsbacher, cooking a tasty and healthy meal is very simple. Three steaming trays allow simultaneous cooking of different foods. The turbo-speed steam generation distributes the heat quickly and evenly; stirring is not necessary, even sensitive food keeps its appetising shape. The flavour distribution cap by means of which additional flavour can be added to all levels with herbs and spices, offers a plus of taste. Even more benefit is guaranteed by the practical universal bowl for making soups, rice and more. The electronic regulation with 6 steaming programmes plus keep-warm function and a 99-minute timer for individual time setting make the ease of use perfect. The water level is controlled electronically, water can be refilled from outside any time. The electronic decalcification indication helps saving energy and superior materials make all parts easy to clean. Due to the stackable steaming trays and a cord compartment, the appliance can be stored in a space-saving way. A thought-out and indispensable aid for tasty and healthy nutrition!

Rated 'very good' in a German consumer test (5/2016).

Test-winner for easy handling & best cooking results (3/2014)

flavour distribution cap for individual addition of flavour and taste

Technical data:

- type: DGS 855
- 230 V ~ 825 W · white/black
- turbo-speed steam generation
- user-friendly, electronic operation, LCD display
- 6 programmes, keep-warm function, acoustic signal upon programme completion
- individual time setting via 99-min. timer
- electronic water-level control and decalcification indication
- 3 steaming trays made of tinted plastic, each holding 3 l, removable bottoms for flexible cooking chamber, stackable into each other for space-saving storage
- 1.2 l universal bowl for rice, soups and more
- condensate collector with flavour distribution cap, cord compartment
- 1.1 l water tank – for up to 1 h continuous operation, water level can be checked and refilled from outside any time
- dimensions: 30 x 22 x 43.5 cm

Naturally healthy!
