

JUICER stainless steel with LCD display

For healthy juices made of fresh ingredients

ROMMELSBACHER

With this superior juicer you can easily prepare even larger quantities of fresh, vitamin-packed fruit or vegetable juices, as this juicer features a very efficient motor power and is laid out for a permanent operation time of up to 30 minutes. This is perfect for easily supplying even extended families or the office staff with healthy drinks. The XXL feeding hole allows for processing whole apples and getting a very high juice output. The soft start function provides for a gentle, low-vibration start of the unit. The speed can be set in 5 levels to match each type and quantity of food to be extracted. Superior materials and a well elaborated construction make handling easy any very convenient. Also a high operational safety is guaranteed by the non-slip rubber feet, the overheating protection and the automatic cut-off function.
