

FILTER COFFEE MACHINE

with insulated jug

Freshly brewed and hot for a long time!

ROMMELSBACHER

"Freshly brewed coffee tastes best!" And if you keep it warm gently, the flavour will last for a long time. That's why we have added a model with a high-quality insulated jug to our popular filter coffee machine. Our FKM 1050 filter coffee machine with insulated jug impresses in every kitchen with its timeless, stylish design. It brews up to 10 cups of aromatic coffee in one go, keeping it hot for a long time in the insulated, double-walled, stainless steel jug. The FKM 1050 shines with its easy-to-use operating concept which ensures a high level of convenience. A particular practical feature is that the water tank can be removed for filling. A light finger tap is all it takes for the touch control sensors to do their job, while the large LED display provides the best overview. With the integrated clock you can pre-programme the start time, which is perfect for an aromatic kick-off to the day. Once the coffee is ready, the drip stop ensures clean surfaces. If you want to give your coffee an extra flavour kick, use the special aroma function. A cleaning and descaling programme has also been included. The FKM 1050 is part of the attractive 'SUNNY' breakfast series, which also includes a toaster and a turbo-fast kettle in addition to our attractive filter coffee machines.

Breakfast series:
water kettle, filter coffee machine
with glass jug, toaster
