

HOT WATER DISPENSER

Turbo!

Instantly hot and temperature accurate

ROMMELSBACHER

Hot water available quickly and everywhere! The mobile hot water dispenser 'Turbo' works especially fast, efficiently, and economically. Within seconds, the powerful instantaneous water heater delivers hot water at the desired temperature from 40 °C directly into cups, to-go mugs, baby bottles or jugs. Perfect for all types of tea, instant drinks, instant soups, and even ideal for the quick preparation of baby food. A total of 13 temperature settings plus direct cold-water supply are possible. The portion sizes can be finely set in 50 ml steps from 100 ml to 400 ml, and continuous dispensing is also possible. The favourite setting can be saved individually. The transparent water tank with water filter holds a good 2.7 litres. The display is clear and well-arranged, and the hot water dispenser is operated via responsive Touch Control sensors. Safety in use is ensured by an overheating protection with reset function. The water tank and drip tray can be easily removed for cleaning. And if descaling is necessary, the descaling programme offers practical user guidance. The HWS 2500 shows a lot of comfort for resource-saving preparation of hot water to the point!
