

# TABLE BLENDER

*in precious metallic red*

For cocktails, smoothies, shakes & more

## ROMMELSBACHER

Powerful 1200 Watt performance and a stainless steel blade for ice crushing make it a perfect cocktail professional. The red table blender made by Rommelsbacher can do even more: delicious, healthy smoothies out of fresh or frozen fruits, creamy milk shakes, puréed soups and dips are prepared quickly and easily. The solid glass jug contains 1.8 liter, due to the convenient opening in the lid the ingredients can be filled in gradually. The well-arranged, illuminated control panel and an integrated safety system allow a simple handling and safety during operation. For simple cleaning in between there is an automatically CLEAN function and to clean it entirely the table blender can be dismantled completely and the removable parts can be put into the dishwasher. A real all-rounder for the superior kitchen!
