

Table blender Stainless steel

Compact design, perfect for small portions

ROMMELSBACHER

This compact, elegant table blender is particularly suitable for preparing small portions. It produces healthy smoothies made of fresh fruit, foamy milk shakes, puréed soups and sauces in a convenient and quick way. The superior glass jug has a capacity of 0.8 litre, thus ideally suited for single servings or freshly prepared baby food. The 2 speed settings and the 4-winged blade made of stainless steel ensure best blending and pureeing results. And in the twinkling of an eye small portions of crushed ice can be made. Should you need maximum power for a short time you can use the handy pulse safety system against unintended use, making handling convenient, easy and safe. After the work is done, you can dismount your table blender completely which makes cleaning especially easy. The perfect aid in small households!

up to 22,000 r.p.m.

*also for
crushing ice*
