

ELECTRICAL OIL PRESS

for home-made fresh oils

cold-pressed and free from additives

ROMMELSBACHER

This electrical oil press is perfectly suited to cater for home made, individual oils of organic quality. Healthy oils, made from seeds, kernels and nuts are important for a balanced diet which abstains from artificial additives. Fresh, home-made oils are also a highly valuable basis for natural cosmetics. This extraordinary appliance comes with two different screw conveyors, so that in addition to all common oil-bearing seeds and kernels (such as pumpkin seeds, peanuts, pistachios), even particularly small oil-bearing seeds like e.g. chia seeds can be processed to yield high-quality oils. The press uses the gentle cold-pressing method preserving the full flavour and all vitamins and nutrients in your oil. Those, who value the authentic flavour of individual, high-quality oils, will find the perfect expert in this electrical press.

Rated „very good“ in a German consumer test

Technical data:

- Type: OP 700
- 230 V ~ 650 W • black/silver
- gentle cold-pressing method
- for all oil-bearing seeds, kernels and nuts
- 2 high-quality, robust screw conveyors made of stainless steel
 - + for common oil-bearing seeds, kernels, nuts
 - + for particularly small oil-bearing seeds (e.g. chia seed)
- integrated heater to preheat the pressing unit
- detachable seed container (approx. 700 g contents)
- with three control elements ensuring easy handling
- reverse function in case of screw conveyor blocking
- safety switch-off when lid is removed
- automatic cut-off when seed container is empty
- completely dismountable, thus easy to clean
- 4 rubber feet for safe stand
- convenient storage thanks to the detachable power cord
- included: 2 collection containers, 1 strainer, 1 cleaning brush
