

PANCAKE MAKER

for 4 American pancakes & patties
Modern baking made easy

ROMMELSBACHER

The versatile Pancake Maker PC 1800 bakes contemporary recipes and popular classics right away four-in-one. American pancakes for breakfast, hearty potato pancakes for lunch and in the evening or at a party, "Pam" bakes hearty burger patties made with either meat or vegetarian/vegan with vegetables. This powerful appliance heats up the four large, non-stick baking moulds in minutes. The appliance is conveniently operated via soft-touch buttons and the LED display provides a good overview. The solid die-cast aluminium plates distribute the heat optimally and ensure even baking results. A timer allows to set individual baking times – to match the filling – and the post-browning function allows even more intensive roasting at the touch of a button. Safety in use is ensured by the automatic switch-off, the 'Cool Touch' housing, an overheating protection and the non-slip appliance feet. The high-quality non-stick coating also makes for easy cleaning, after which the PC 1800 can be stored vertically, thus space-saving in the cabinet. The perfect appliance for the contemporary kitchen!
