

GOURMET RACLETTE

Ottimo

..... simply in good shape!

ROMMELSBACHER

This raclette and grilling appliance coming with 8 pans and a curved non-stick aluminium die-cast grill plate is quite out of the ordinary regarding its shape and functionality and it is a very special eye-catcher on each table. The curved grill plate allows excess fat to drain off to the slightly cooler side areas. This provides for low-fat grilling pleasures and prevents the fat from scorching in the heat of the grill. The infinitely-variable thermostat ensures temperatures can be set just right for all kinds of uses. And as a special add-on the integrated parking surface allows for pans to be "parked" in the unheated area every time you take a break from eating. With pilot lamp and overheating protection this appliance grants appropriate security in use. The very special Gourmet raclette - the deluxe version for the demanding!
