

TRAVEL IMMERSION HEATERS

Stainless steel

Practical, quick, compact

ROMMELSBACHER

An established classic of German production. The handy travel immersion heaters, made of high-grade stainless steel, are just perfect to quickly heat small amounts of water when travelling, in the office and also at home. Whether in a cup, in a heat-resistant tumbler or in the tea pot – the required amount of water is quickly heated directly in the vessel. The coil is made of superior, food-safe stainless steel material, thus it is free of allergenic metals like e.g. nickel. The heat insulated handle with spacer and an integrated overheating protection guarantee high safety in use. The appliance comes in a convenient zip case (assorted colours) which makes the unit being a perfect gift as well.

Type RT 350

Type RTG 351
