

TEA MAKER & WATER KETTLE

*For brewing any type of tea perfectly,
and an eye-catcher when boiling water*

ROMMELSBACHER

An elegant appliance, which convinces by its elaborate features and a superior workmanship. The jug is made of heat-proof original Schott DURAN® glass. In addition to the 5 preset programmes, the electronic menu control allows for setting and saving 11 different brewing temperatures (50 °C – 100 °C) as well as the steeping time (up to 10 minutes), to perfectly correspond to the used tea type. Whether black tea, green or white tea, whether teas made of fruit or herbs – thanks to the precise temperature accuracy this tea maker delivers best results to match every taste. Brewing the perfect tea is easy now: fill in water, select the programme of your choice and – if required - adjust temperature and steeping time; the appliance will continue by itself. Once having reached the set temperature, the signal tone of the unit will prompt to insert the tea infuser. And once the steeping time has run off, another signal tone indicates that the tea infuser has to be removed. The automatic keep-warm function just rounds off the pleasant handling of this appliance. And in addition, there is a separate quick-start button for using the unit as a water kettle, without any further setting. Even demanding tea drinkers will love this Rommelsbacher tea maker!

Technical data:

- Type: TA 1400
- 230 V~ 1400 W • stainless steel/glass
- decorative jug, 1.2 l, of original Schott DURAN® glass
- LCD display, 5 programmes for tea brewing
- exact temperature accuracy
- temperature regulation from 50 °C – 100 °C
