

COOKING PLATES *with timer*

A quality product "Made in Germany"

ROMMELSBACHER

These cooking plates in the appealing softline design are especially robust and suitable for any cookware. The distinctive feature of this version is the control via a 15 minute timer, which switches off the heating process automatically after the set time has elapsed. Due to this safety feature, the cooking plate is ideally suited for usage in areas with public access (such as shared kitchens) or for people with greater needs for safety (e.g. senior citizens). Non-slip feet and the pilot lamps add to the plus in safety. The durable cast-iron heating plates ensure best heat distribution. The casing is easy to clean and thanks to the fire-enamelling it remains white even after longer usage. This is a real quality product manufactured in Germany!

Technical data

- white fire-enamelled casing
- softline design
