

# HEAT STORING WARMING TRAY

*Made in Germany*

Mobile, convenient, exquisite

**ROMMELSBACHER**

Attractive, versatile and indispensable - an eye-catcher crowning every laid table. The heating surface made of brushed stainless steel is durable and easy to care. With the power cord connected, the storing plate is heated to maximum temperature within 8 minutes only. Once heated up, the cord can be removed and the warming tray is ready for use on buffets or on the table. It will keep your dishes warm for about 60 minutes, without the necessity of being connected to the power cord. A very convenient appliance for many opportunities, as e. g. outdoor dining or for mobile use on trolley-tables. And in addition it makes a perfect gift of German make.
