

## STAINLESS STEEL CITRUS JUICER

*Homemade juices - refreshing, healthy  
and rich in vitamins*

**ROMMELSBACHER**

No doubt, freshly-squeezed juices just taste best. With this elegant citrus juicer of high-quality stainless steel, you are able to squeeze the juice until the last drop of oranges, lemons and grapefruits in next to no time, thanks to the two different juice cones. A slight pressure is sufficient and the powerful motor will provide for the rest. Ideal for the vitamin kick in between. The juice directly flows into a glass by a foldable spout. The stainless steel strainer is removable and can be cleaned in the dishwasher together with press cones, juice collector and dust protection cover. Freshly squeezed juice should not be missing on any breakfast table.
