

COFFEE MILL with disc grinder

Gentle grinding without aroma loss

ROMMELSBACHER

This superior coffee mill with shapely high-gloss plastic casing and decorative stainless-steel application is an eye-catcher in every kitchen. The bean container with flavour cover keeps the beans aromatic. In the robust grinder, two superior steel grinding discs treat the coffee beans gently until the set grinding degree is reached, which can be set individually from coarse to fine. The desired powder quantity (2 – 12 cups) is selected via a rotary knob. The detachable powder container makes it easy to take the ground coffee out and the detachable grinding disc provides for an easy cleaning. The practical cord take-up for cord not in use makes the pleasantly easy and safe handling of this appliance perfect.

stainless steel appliqué

Technical data:

- type: EKM 200
- 230 V ~ 110 W • black
- quiet and robust disc grinder
- individual adjustment of the grinding degree
