

SOUP & VEGGIE DRINK MAKER

for homemade veggie drinks & soups

Vegan diet made easy

ROMMELSBACHER

Vegetable drinks as a healthy and vegan alternative for (cow) milk are getting more and more popular. Whether oat drink, soy or almond "milk" – they must not miss out for a conscious or vegan and especially lactose-free nutrition. With the soup & veggie drink maker *Vera* by ROMMELSBACHER you can prepare finest plant drinks with a comfortable and energy-saving method at home. The attractive cool-touch casing comprises a stainless steel inner container with integrated heating. The lid is connected to an efficient and powerful mixing and stirring unit: a three-winged stainless steel blade which is equipped with a special, detachable blending bell, allows for especially fine textures when mixing the veggie drinks. Also creamy (vegetable) soups and porridge can be cooked in *Vera* and you can even use this multi talent for preparing mixed drinks and smoothies. This is possible by 9 different programmes as well as a pulse-function for very precise mixing and shredding. High-quality materials and a well thought-out technology with numerous safety features leave no operation demand unfulfilled. Make food yourself instead of buying it – the SVD 1400 contributes to a more sustainable way of life. This practical appliance convinces everybody who values high-quality vegetarian food without any artificial additives.

Mixing/stirring unit with stainless steel blade and detachable blending bell

Technical data:
