

# INDUCTION COOKING PLATE

*Vertical!*

Mobile, flexible, quick and economical!

**ROMMELSBACHER**

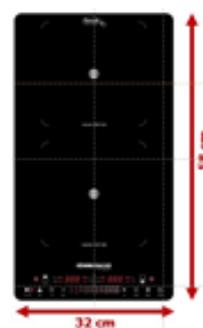

The special feature of this mobile double cooking plate is the vertical arrangement of the cooking zones. The special format allows optimum use of the workspace, making this high-quality hot plate from ROMMELSBACHER particularly suitable for small kitchens, offices and apartments. The super-flat design and high-quality materials of the CT 3430/IN do not only care for a stylish appearance but also ensure pleasant handling.

Cooking with induction is efficient, economical and modern. Thanks to the electromagnetic field of induction, the temperature is immediately available in the pan bottom without any heat-up time - as fast as with gas, but safer with electricity. With 16 power and 14 temperature settings, even the most demanding cooks will be satisfied. The control with slider touch sensors, the high efficiency of induction and the easy-to-clean glass ceramic surface are just some of the features that make this vertical double cooking plate stand out from the crowd. Functions such as residual heat indication, child safety lock and pan detection also add to the safety when using this attractive, mobile induction cooking plate.

Induction

for induction-compatible cookware

super flat design

## Technical data:

- type: CT 3430/IN • 230 V ~ 3400 W
- 2 cooking zones, each 120 – 260 mm Ø (2000 / 1400 W)
- super-flat design, height only 43 mm
- space-saving format due to vertically arranged cooking zones
- energy-saving induction technology, electronic control
- operation via Slider Touch & Touch Control sensors, LED display
- high-quality glass ceramic surface, seamless and easy to clean
- for induction-compatible cookware from 120 to 260 mm Ø
- innovative 'adjust' function:
  - in the 90 °C - 120 °C range, the temperature levels can additionally be adjusted in 5 °C increments
  - in the range of power levels 1 - 6, the power can also be adjusted in 0.5 increments
- in total 16 power levels, 14 temperature levels from 60 °C - 220 °C
- 180-minutes timer with signal sound, pause function and automatic switch-off function
- maximum safety: residual heat indication, child safety lock (key lock) against unintended operation, pilot lamps, pot recognition, automatic switch-off and non-slip feet
- EAN: 40 01797 67510 1
