Speedy

Quick, small and energy-saving!

ROMMELSBACHER

Small but mighty – the light-weight of our oven line! Perfect for the small household but also practical as addition for every kitchen. No matter if baguette, toast, rolls or muffins ... whatever you want to prepare, you will save energy with the heating of the small oven chamber in any case. And the double-glazing of the oven door as well as the door seal additionally have a positive effect on the energy balance. The temperature is infinitely variable from 80 °C to 230 °C and the 30-minute timer with continuous setting and signal tone makes the ease of use perfect. Thanks to the non-stick coating of the oven chamber, the chic appliance is easy to clean.
