

SANDWICH MAKER

for 2 luscious sandwiches
Snacking in XL format

ROMMELSBACHER

This solid sandwich maker conjures two hot sandwich toasts in no time at all, which can also be XL and generously filled. It is perfect for quickly and conveniently delighting big and small sandwich lovers with crispy, juicy sandwich specialities. Whether classically filled or topped according to your own preferences, whether as a snack, as a main course or made of cake batter for dessert - the possibilities are surprisingly diverse. The baking moulds of the ST 1000 are extra deep and designed for generous fillings; their special design prevents them from overflowing during preparation. The powerful appliance heats up quickly and bakes very evenly; the extra-high dividers make it easy to partition the finished snacks. Safety in use is assured by the heat-insulated handles, overheating protection, two pilot lamps and the solid, stable and non-slip construction. Cleaning is very easy thanks to the special design of the baking moulds and the high-quality non-stick coating. And in the end, the sandwich maker can be stored vertically in the kitchen cupboard to save space, so that it is quickly ready to hand for the next use.

high-quality 2-layer
non-stick coating
