

MULTI RICE COOKER

with innovative "low carb" function

For rice pudding, soups & for steaming

ROMMELSBACHER

With the compact Multi Rice Cooker *Risa*, it is as simple as never before to prepare all common types of rice in an energy-saving and convenient way. Whether basmati, jasmine, sadri or whole grain – every rice turns out perfectly. This Multi Rice Cooker is extremely versatile, as this appliance is also perfect for preparing rice pudding and risotto, for steaming vegetables and for heating food. The great highlight of this model is the innovative "low carb" function which reduces the carbohydrate content of rice up to a third by a special multi-stage cooking process. Thereby *Risa* meets the current nutritional trends for conscious and low-carb nutrition. *Risa* also knows how to convince optically: the attractive Cool-Touch casing with a matt look and a high-gloss sensor-touch control panel is an eye-catcher. The large LED-display and the illuminated program displays always provide an overview. But the inner values are also impressive, namely through an integrated heating plate and an electronic temperature monitoring with even two temperature sensors. 3 fully automatic rice programmes as well as 3 programmes with manual setting of the cooking time allow a comfortable preparation of rice, but also the adaptation to very individual taste preferences for rice pudding. High-quality materials, sophisticated technology and versatile accessory make this rice cooker a valuable helper in large and small kitchens.

Technical data:

- type: **MRK 500**
- 230 V ~ 500 W • dark grey
- innovative "low carb" function to reduce carbohydrates in rice
- for preparation of up to 4 servings of all common types of rice
- high-quality, heat insulated Cool-Touch casing for high energy efficiency
- integrated heating plate for quick heating, electronic temperature monitoring for gentle preparation
- 6 programmes for various and individual use: rice, whole grain, "low carb", rice pudding, soup, heating up
- clear LED-display, showing programme selection, residual time and keep warm time
- comfortable operation by Touch Control sensors, practical keep warm function
