

ROMMELSBACHER

Chef's Guide

2024|2025

OVER 95 YEARS OF TRADITION, A SOURCE OF TRUE PRIDE!

Gustav Rommelsbacher

Susanne and Wilfried Bauer

Sigrid Klenk

1928

1953

1991

Our roots are in Stuttgart, where Dipl.-Ing. Gustav Rommelsbacher started his business in the year 1928 with the design and production of loudspeaker systems. He was an inventive genius with innovative ideas and the good instinct for the trends and needs of his time.

After World War II, Dinkelsbuehl became his new home. He started his production in a garage, with all materials he could get hold of, and made electric appliances which were urgently needed. Radiators, electric irons and mobile hotplates were manufactured under the brand name robusta and soon they were delivered to several countries.

The first brick-built factory was designed and expanded in the years that followed. His son, his daughter and his son-in-law joined the team and robusta became ROMMELSBACHER. In a spirit of great commitment, with high quality appliances and the strengths of a family-owned company, they developed a brand which is well-known for its first class products.

In 1991, the third generation entered the business and in 1995, ROMMELSBACHER moved premises to a larger block of buildings which formed the perfect basis for further growth.

In the years 2014 and 2015, the largest investment to date was made with the construction of a new large warehouse, the expansion of the production areas and an additional modern administration building, placing ROMMELSBACHER in an even better position for the future. Ongoing extensive modernizations in production and warehouse logistics for even better working conditions round off these optimizations. The photo studio inaugurated in 2022, together with other modern offices, is currently being equipped with an attractive test kitchen for photo and film shootings.

Join us - experience us! A real German family business - with a great team, great products and a lot of JOY!

QUALITY MADE IN GERMANY

Over 100 employees with more than 1.000 years of cumulated ROMMELSBACHER know-how develop, design and manufacture high-quality appliances which are Made in Germany and provide 'Pure Cooking Pleasure' true to our company's motto.

We can react flexibly on your requirements and offer tailor-made solutions, which convince not only thanks to functional and aesthetic qualities but also for economic reasons.

We take pride in our over 95-year history, our committed team, our family-owned company and our brilliant range of products, which is presented in this catalogue and well worth a browse.

SINGLE COOKING PLATE

CTS 2000/IN Induktion

INNOVATION! Cooking has never been so easy!

- 1 cooking zone: 145 – 220 mm Ø, suitable for pots and pans up to 260 mm Ø
- „Intelligent Temperature Control Sensor“
- automatic control of temperature and power:
 - precise manual setting from 42 °C to 220 °C
 - 6 direct selection programmes: Yogurt, Sous Vide, Slow Cook, Boil, Fry, Roast, individually adjustable to the degree
 - 10 power levels with continuous power output: 75/150/300/400/500/700/900/1200/1500/1800 W
 - booster function: 2000 W
- regulation via quick touch control sensors
- LED-Display, key lock as protection against unintentional operation
- 10-hour timer
- pot recognition, residual heat indicator
- frameless, all-over glass ceramic cooking surface
- super flat design, height only 4,1 cm
- quiet operation by optimized cooling of housing

*Sensor scans the exact heat data directly at the pot!
Cooking, roasting, boiling accurate to temperature.
No more scorching or boil over!*

COLD-ZONE DEEP-FRYER

FRP 2135/E

Deep-frying like a pro

- semi-professional stainless steel deep fryer
- cold zone principle, heating element cover with diffuser
- oil/grease capacity 3.5 litres
- temperature infinitely variable up to 190 °C via capillary tube regulator
- 30-minute timer with signal tone
- separate on/off switch
- removable stainless steel frying container
- domed stainless steel lid for condensate drain with viewing window, metal permanent filter and thermosolating handle
- condensate collecting channel with integrated slope running around the housing and collecting container at the back
- large deep-frying basket, approx. 22 x 16.5 x 7 cm with retractable handle
- lifting and lowering of the frying basket possible with closed lid
- exact position of heating element in metal support with 45° locking position to allow the heating element to drip off before removing the deep-frying container
- lateral, insulating plastic carrying handles for transport
- total-clean system: appliance can be completely dismantled, dishwasher-safe except for heating element
- overheating protection, operating and temperature pilot lamp

ELECTRIC OIL PRESS

OP 700 Emilio

**Best quality – gentle cold-pressing method:
free of additives, 100% taste in organic quality**

- 2 robust screw conveyors, made of stainless steel
 - for common oil bearing seeds, kernels and nuts
 - for particularly small oil bearing seeds (e.g. chia seeds)
- heater to preheat the pressing unit
- detachable seed container for a content of approx. 700 g
- simple operation via 3 control elements
- reverse function of the screw conveyor
- safety switch-off when lid is removed
- completely dismountable, thus easy to clean
- detachable power cord – for a convenient storage
- including: pulp container, oil collection container, strainer and cleaning brush

YOGURT & CREAM CHEESE MAKER

JG 80 Jona · JB 4 · JG 1

**Preparing healthy natural yoghurt and cream cheese –
also for making aromatic herbal extracts**

- 4 programmes with different temperatures:
 - natural yogurt (42 °C)
 - vegan/lactose-free yogurt (38 °C)
 - cream cheese (30 °C)
 - herbal extracts (55 °C)
- preparation time individually settable, e.g. for sour dough
- 24-hour timer with signal tone, automatic switch-off
- LED display with touch control sensors
- inner pot made of stainless steel
- overheat protection
- removable transparent cover
- removable power cord
- double-walled housing
- including: 4 ceramic portion cups (each 125 ml) with cover,
2 XXL glass containers (each 1.2 l) with cover and 1 strainer with cover

ELECTRIC PASTA MAKER

PM 220 Pastarella

Fresh pasta at the touch of a button – perfect pasta, made fully automatically ingredients according to preferences – also whole grain, gluten-free, with egg

- versatile by 6 fully automatic programmes (for various types of flour)
- variable by 2 manual programmes and buttons for:
 - adding more water
 - manual kneading and pressing of the dough
- integrated scale with controlled water supply, for up to 800 g of fresh pasta
- solid conveyor screw made of stainless steel, sturdy 2-winged kneader, kneading container and lid especially break-proof and detachable
- detachable water tank 375 ml, electronic indication of water level
- 7 exchangeable pasta forms (matrices), stored in integrated accessory box
- easy operation via comfortable operating elements and clear LED display
- integrated fan for surface drying of the pasta (to avoid sticking)
- safety stop when unlocking the lid
- dismountable for easy cleaning
- including: measuring cup and cleaning brush

7 different matrices provide a great variety of forms

VACUUM SEALER

VAC 385

Keeping food fresh for longer

- high quality piston pump, approx. 12 litres/minute
- comfortable one-hand operation
- fully automatic and manual vacuuming and sealing
- individual air suction and manual sealing for pressure-sensitive foods
- intelligent sealing time adaptation – energy and time saving
- solid sealing seam with a thickness of 2.5 mm
- for foils up to 30 cm width and for vacuuming containers
- integrated roll compartment including cutter
- removable vacuum chamber insert
- hose port for vacuuming in containers
- integrated cord take-up, 4 non-slip rubber feet
- housing made of high-quality, easy-care stainless-steel
- including: 10 foil bags, 1 foil roll, vacuuming hose and cutter

EXCELLENT ELECTRICAL HOUSEHOLD APPLIANCES

There are many rewards for quality and design that affirm the excellent working of the complete team. Each single logo is a proof for us that our products and the trade mark ROMMELSACHER are going down well also with the consumers and that people appreciate our high quality standard.

"We attach great importance to the fact that our brand values like quality, reliability and a strong customer focussing are not only communicated, but get also implemented and put into practice stringently.", said Mrs. Sigrid Klenk, managing director of the ROMMELSACHER ElektroHausgeräte GmbH.

We are meeting this challenge with great pleasure and get excited even more when our efforts get recompensed by so many excellent rewards. Please see a selection of our rewards below.

SUSTAINABILITY – MORE THAN MERE ECOLOGY!

We understand sustainability as an holistic approach, a composition of ecology, economy and social responsibility. ROMMELSACHER is one of the very few enterprises in the electrical household sector who is manufacturing in Germany. Materials and components are mainly purchased from local partners.

We attach great importance to the fact that customers may experience a longstanding and trouble-free usage of our products, pursuant to our motto "pure cooking pleasure". And just in case, we are keeping a stock of spare and wear parts for our products for years to come, as they can be repaired with simple tools. Even returned appliances get a second life cycle after a thorough check.

Establishing new buildings and doing some renovation work in the year 2015, brought our enterprise up to date with the latest energetic technology. Also the workplaces of our staff were ergonomically and ecologically optimized. Our next goal is to achieve climate-neutral production at the Dinkelsbühl site. To achieve this, we will use further resources for an ecological energy production.

We develop and distribute appliances that are meant for preparing healthy and rich dishes and which comply with a sustainable handling of food. To emphasise are e.g. our vacuuming systems, which prolong the shelf life of foods quite a lot. Also our oil press OP 700 "Emilio" is worth to be mentioned, as it is not only possible to make cold-pressed oil from seeds and kernels but even the remaining oil cake can be used for preparing healthy dishes. And our spiralizer EGS 80 "Gnudel" got the 'Eat healthy'-Award.

We recently got the grade for "Trusted Sustainability", which makes us very happy. But we do not consider it to be a final confirmation, however, to be the starting shot for a constant monitoring how we can improve.
